

Dott. Antimo Gioiello (English version)

Research Interest

General areas of interest are: *Synthetic and medicinal chemistry (natural products, steroids, heterocyclic compounds), Drug discovery, Flow chemistry, Microwave-assisted synthesis, Solid supported reagents and scavengers, Process/reaction optimisation, Design of Experiments, Robotics and automation, Reaction mechanisms.*

Focussing on a multi-disciplinary approach, my research activities are centred on the design and synthesis of biologically active molecules for nuclear receptors, GPCRs, and a variety of enzymes as therapeutic targets in CNS disorders, cancer, liver, and metabolic diseases. The compounds employed as investigative tools are the basis for exploring the pharmacological and therapeutic relevance of biological targets in collaboration with a wide range of national and international research groups. A primary aspect of my research is the development of synthetic methodologies which encompass the effective and efficient use of knowledge in investigating new reactions, the design and implementation of new processing methods for solving challenges associated with compound library building and large scale preparations. To these aims, advanced synthetic tools and enabling technologies such as flow apparatus, microwave reactors, solid supported reagents and scavengers are associated with automation to improve the speed, efficiency, safety and cost of specific chemical transformations.

Main Research Topics

- Bile acid-responsive nuclear and membrane receptors including FXR, TGR5, PXR, CAR and VDR;
- Steroid-activated nuclear receptors such as DAF-12;
- Steroid chemistry, characterization and analysis;
- Flow chemistry;
- Process and reaction optimization of bioactive compounds, key intermediates and building blocks by using design of experiments in both batch and flow conditions;
- Reaction, reactivity and mechanisms of diazo compounds.

Key Collaborations

- Intercept Pharmaceuticals, New York (USA)
- Servier, Paris (France)

- Department of Chemistry, Durham University, Durham (UK)
- Institute for Applied Synthetic Chemistry, Vienna University of Technology, Vienna (Austria)
- Department für Pharmazeutische Chemie, Universität Wien, Vienna (Austria)
- Faculty of Pharmacy, Gazi University, Gazi (Turkey)
- Italian Institute of Technology, Genova (Italy)
- Dipartimento di Chimica ‘G. Cimiciani’, University of Bologna, Bologna (Italy)
- Dipartimento di Farmacia, University of Parma, Parma (Italy)
- Dipartimento di Farmacia, University of Naples Federico II, Napoli (Italy)

Invited Lectures

1. **Gioiello, A.**; Macchiarulo, A.; Guerrieri, E.; Carotti, A.; Rizzo, G.; Adorini, L.; Pellicciari, R. “New potent and selective FXR agonists: design, synthesis and modeling of norcholanylamine derivatives.” Nuove Prospettive in Chimica Farmaceutica (IV Meeting). S. Margherita di Pula (Italy), May 6-7, **2010**.
2. **Gioiello, A.** “Novel explorations with bile acids. Case studies in organic and medicinal chemistry.” X Laboratorio di Metodologie Sintetiche in Chimica Farmaceutica. Siena (Italy), February 13-17, **2011**.
3. **Gioiello, A.**; Macchiarulo, A.; Sabbatini, P.; Venturoni, F.; Nuti, R.; Rizzo, G.; Adorini, L.; Roda, A.; Pellicciari R. “Avicholic acid: a primary bile acid from birds on the route to potent and selective TGR5 ligands.” XXIV Congresso Nazionale della Società Chimica Italiana. Lecce (Italy), September 11-16, **2011**.
4. **Gioiello, A.**; Macchiarulo, A.; Pellicciari, R. “Bile Acid Derivatives: An Emerging Class of Compounds in Inflammation and Metabolic Disorders.” XXII Congresso Nazionale della Chimica Farmaceutica della Società Chimica Italiana (XXII National Meeting on Medicinal Chemistry). Roma (Italy), September 10-13, **2013**.
