

Intern Technical Business

When you're part of the team at Thermo Fisher Scientific, you'll do important work. You'll have the opportunity to grow and learn in a culture that empowers your development. We have built an inclusive, global environment that values the power of diverse talent, backgrounds, and experiences to drive speed, efficiency, innovation, and growth.

Our internship program will give you a chance to get real world business experience and build your network before graduation. We are seeking an upbeat, responsible intern to join our growing organization. In this position, you will learn the ins-and-outs of our daily routines and procedures. You will focus on learning how our organization runs and will gain valuable insight that can further your interest in your chosen career field. This position has many opportunities to offer!

Customers throughout the globe rely on our extensive range of products and services—from next-generation instruments to everyday lab essentials to life-saving medicine. If you desire joining a world-class team, Thermo Fisher Scientific can provide you with the opportunity to work in quality assurance and regulatory affairs to produce products that enable our customers to make the world healthier, cleaner and safer.

Summary of Internship

This internship provides hands-on experience in **Business and Portfolio Service Management** within a pharmaceutical services environment. The role focuses on supporting client relationships, coordinating technical activities, and contributing to business growth and performance tracking.

Internship Opportunities to Build Competence in Key Areas

Client Experience & Relationship Management

Support client engagements and account management activities to ensure alignment between client expectations and organizational priorities. Contribute to service excellence by coordinating communications, tracking deliverables, and helping resolve operational challenges.

Portfolio Business Management

Assist in identifying growth opportunities by leveraging existing client relationships. Collaborate with commercial teams to support business expansion initiatives and promote organizational capabilities.

Technical & Operational Excellence

Gain exposure to technology transfer processes and product lifecycle activities. Support continuous improvement initiatives, including Lean and Operational Excellence projects, aimed at enhancing efficiency and quality.

Financial & Forecast Awareness

Develop an understanding of revenue forecasting, budgeting, and contract alignment. Collaborate with internal teams to support data accuracy and contribute to business planning activities.

GMP & Health and Safety Compliance

Learn and support compliance with cGMP standards and Environmental Health & Safety (EH&S) requirements, contributing to a safe and compliant working environment.

Essential Functions

- Support client relationship activities, including communication coordination and issue tracking
- Assist in identifying and analyzing potential business opportunities
- Contribute to the coordination of technical projects and process improvement initiatives
- Support forecasting and reporting activities in collaboration with finance and commercial teams
- Participate in cross-functional collaboration with production, quality, and operational teams
- Assist in maintaining documentation aligned with quality and compliance standards
- Learn and apply GMP and EH&S principles in daily activities
- Engage with internal and external stakeholders, including clients, suppliers, and third parties
- Actively seek feedback and demonstrate continuous learning and improvement

Qualifications

- Student currently enrolled in a bachelor's degree Life Sciences, Engineering, Pharmacy, or a related field
- Strong analytical, organizational, and communication skills
- Client-focused mindset with the ability to manage multiple priorities
- Proficiency in Microsoft Office (Excel, PowerPoint, Word)
- Interest or basic knowledge in pharmaceutical manufacturing or outsourcing is a plus
- Ability to work independently and collaboratively in a cross-functional environment
- Eagerness to learn, adapt, and grow in a dynamic setting

Languages

- Proficiency in English required
- Italian is a plus

External Relations

- Clients
- Third parties
- Suppliers
